

WALL to WALL designs in wood

While nickel gap wall covering is still in high demand, we are seeing some eye-catching new options when it comes to utilizing wood elements on interior walls. Painted or stained, wood accent walls are a wonderful way to add visual interest and texture to your interior space!

Here are several ideas that will instantly liven up an otherwise plain wall!

WOW FACTOR WALLS

A creative geometric pattern has transformed this mid-century modern dining room wall (*above*) into a stunning focal point! This unique design was crafted using 1/4" White Oak plywood, 1-1/4" x 2" S4S White Oak and a splash of creativity!

The design featured on the upper wall (*below*) was created using our 1-1/2" x 1-1/2" S4S White Oak, applied vertically. The drywall behind the S4S was painted black, adding additional depth and contrast.

SKINNY LAP

Are you wondering how (or if!) you can incorporate nickel gap wall covering into your contemporary designs? We've got you covered!

Similar to the traditional nickel gap, this narrow, 3/4" x 1-1/2" version (2448-IT-SL) (*above*) lends itself to a much more modern look and feel and works well with today's contemporary and transitional designs.

GEOMETRIC DESIGNS

Wood accent walls accomplish what paint and wallpaper are seldom able to do; that is, achieving a standalone work of interior art.

Geometric designs have become an increasingly popular way to transform a plain wall and make a dramatic statement!

This creative wall design (*right*) utilizes varying widths of our 1/2" thick, S4S Poplar,

MIX IT UP!

Looking for a new twist on nickel gap?

Instead of using the same widths, try mixing the widths to create a unique, casual look!

This design (*left*) utilizes a combination of 3", 5" & 7" widths of our QRK nickel gap in Knotty Poplar, with a white wash finish.

This mixture strikes the perfect balance when incorporated into today's less formal, shabby chic architectural designs.

STATEMENT WALLS MADE SIMPLE

Who would have thought that something as simple as half round could transform a plain white wall? (We did!)

Our 2448-HR, 3/4" x 1-1/2" Poplar half round was used (*left*) to add an element of texture and character to this all-white wall!

CROWN + CREATIVITY

While this is certainly not your typical crown installation, it demonstrates how a simple, cove crown moulding can be utilized in a non-traditional way. All it takes is a bit of creative ingenuity!

This design (*left*) features a White Oak cove crown, run vertically as a backdrop for a theater wall.

Recreate this look with our 2080-LW-CR, 2-1/2" cove crown, or for a wider option, use our 24136-IT-CR, 4-1/4" symmetrical crown,

BOARD & BATTEN

While board and batten is historically associated with Arts & Crafts architecture, it also works well with minimalist, modern, and transitional styles.

Using board and batten in an entryway or staircase gives your space texture and character. The design possibilities are endless - board and batten can be installed vertically, diagonally, and everything in between!

Replicate these designs (*below & right*) or create one of your own with our 1/2"thick S4S Poplar, stocked in a variety of widths, including 2", 3-1/2" and 5-1/2"!
